

How to fold: A simple plant (Ver. 2)

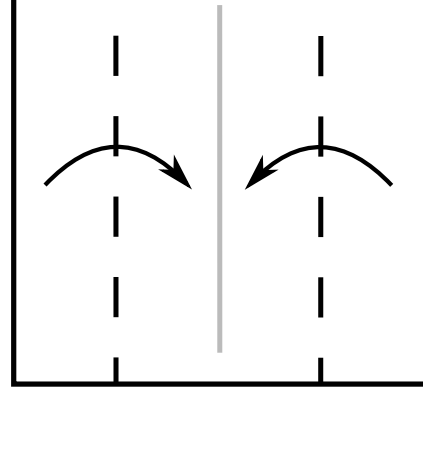

Difficulty: 6/10

1.

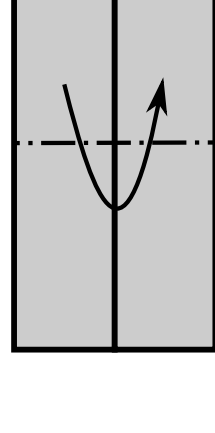

Valley fold and unfold.

2.

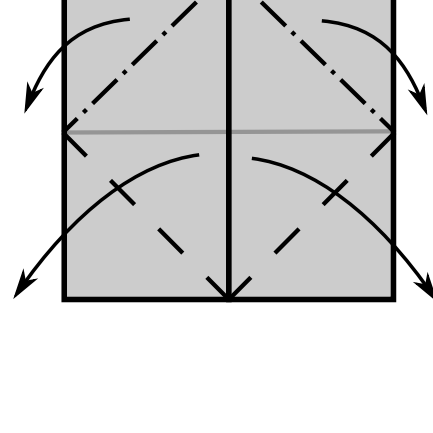

Valley fold.

3.

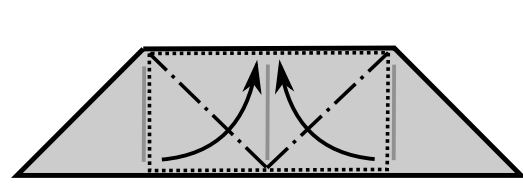

Mountain fold.

4.

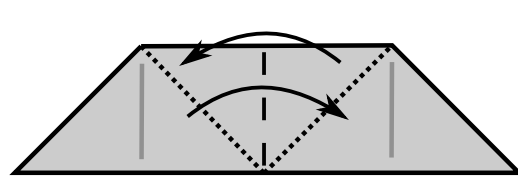

Spread open the paper in the direction of the arrows. Repeat behind.

5.

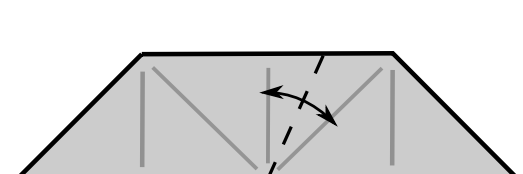

Reverse fold the inner layer.

6.

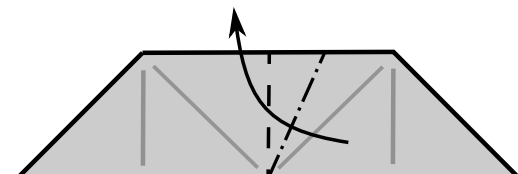

Valley fold one layer. Repeat behind.

7.

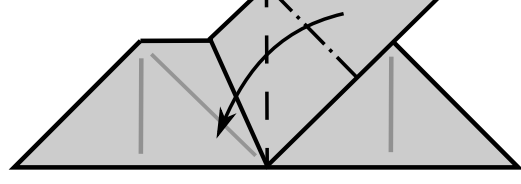

Valley fold and unfold.

8.

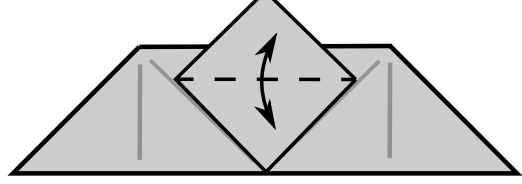

Squash fold.

9.

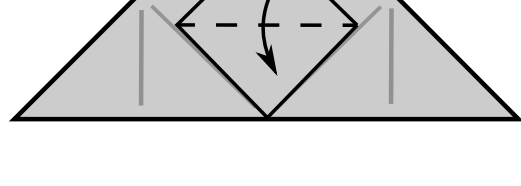

Squash fold.

10.

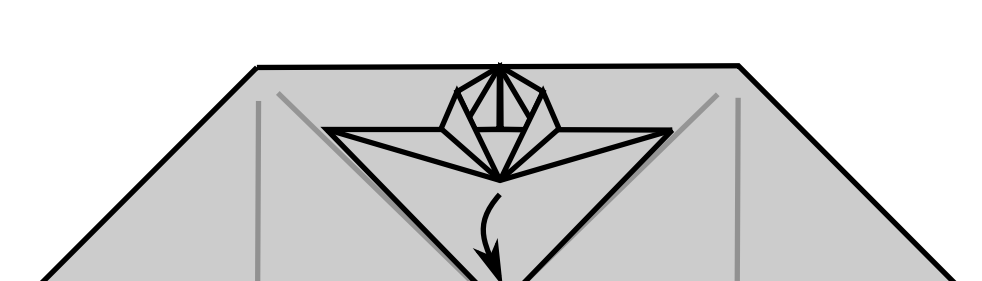

Valley fold and unfold.

11.

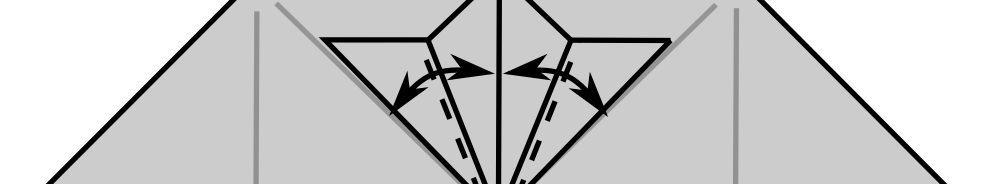

Valley fold. You will need to add a petal fold on the bottom layer.

12. (Enlarged for better viewing)

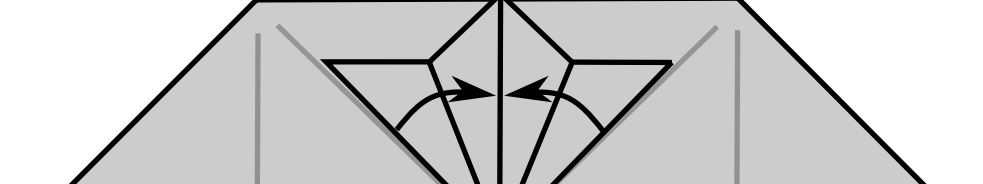

Partway through step 11.

13.

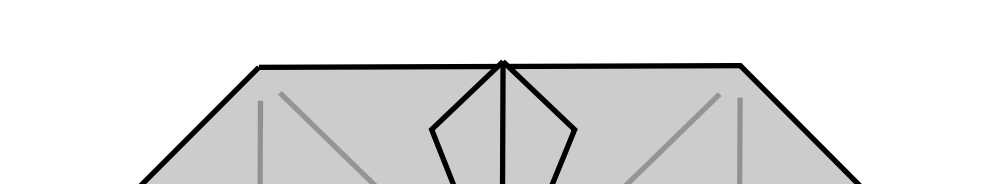

Valley fold and unfold.

14.

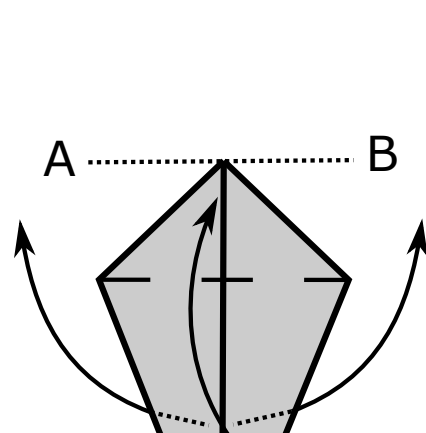

Outside reverse fold on the creases formed in step 13, covering the top layer in the process.

15.

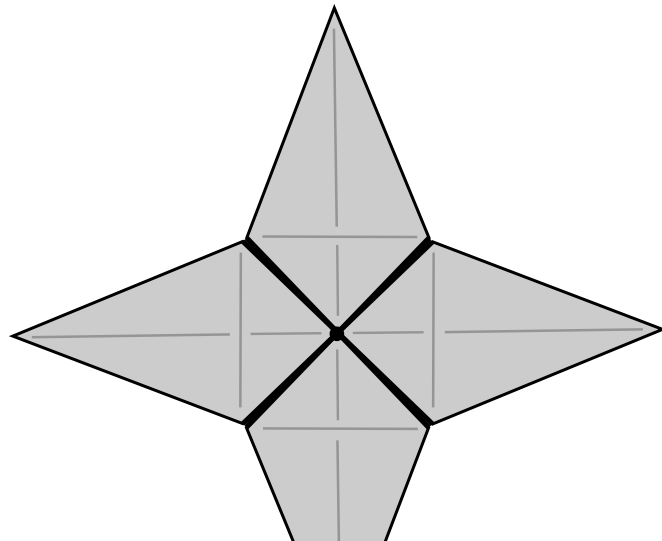

Expected results. Repeat steps 7-14 on the other three panels.

16.

Valley fold all four flaps so that they will be parallel to imaginary line AB when viewed from the side. The model will become three-dimensional. Rotate the model so it stands on its 'feet'.

Finished result

(Top view. The model should stand on 4 'legs' and have a tall point in the center. This is roughly 1/4 the size of the first version.)
